Common Chapter

Revision History

Section	Change Log	Version	Date
1	Added the following fields: “Transaction Acceptance Method” and “Cardholder Form Factor”. Added the following rule to the Plan Registration System Identifier field: “If this field is present in a transaction, the Bill Payment Transaction Indicator field must be sent with the value of ‘Installment’." Added the following rule to the Transaction Type field: ”When the Transaction Type is 'Refund', the Bill Payment Transaction Indicator field and POS Condition Code field with value '04' should not be sent.” Added the value “BankPay – Bank Pay” to the Digital Wallet Program Type field. Added the following rule to the Digital Wallet Program Type field: “This field with the value of ‘BankPay’ must be sent in a transaction that was initiated through a BankPay Digital Wallet In-App.” Added the following rule to the Refund Type field: “This field must be sent when the Transaction Type is ‘Refund’, and Card Type is ‘MasterCard’ or ‘MaestroInt’.” Added “*Completion” to the Void/Full Reversal column for Card Type of Visa, Amex, Discover, JCB, Diners, MasterCard and UnionPay in the Reversal Support Table of the Reversal Reason Code field. Added the following rule to the POS Condition Code field: “When the Card Type is 'Visa', POS Condition Code '04' is not permitted when the ACI field (Visa Group) contains the value of ‘I’.” Changed the rule in the Universal Unique Identifier field from "This field is only applicable in transactions which contain the EBT Type field." to "This field is only applicable in transactions which contain the EBT Type field, or the Card Type field with the value of ‘Comdata’." Added the following rule to the Universal Unique Identifier field: "For Comdata transactions, if this field present in the original authorization response, this field must be sent in all subsequent transactions. The value must be the same as that returned in the original authorization response."	15.04.5	February 25, 2026

1	Changed the rule in the POS Condition Code field from "When the Card Type is 'MasterCard' or 'MaestroInt', this field is mandatory and must only be sent with the value of '04' in the following scenarios: • The Bill Payment Transaction Indicator is 'Recurring' or 'Installment' • Transaction Initiation is 'Merchant' and Card on File Schedule Indicator XML Tag: CofSchdInd is 'Unscheduled'". to "When the Card Type is 'MasterCard' or 'MaestroInt', this field is mandatory and must only be sent with the value of '04' in the following scenarios: • The Bill Payment Transaction Indicator is 'Recurring' or 'Installment' • Transaction Initiation is 'Merchant', Card on File Schedule Indicator XML Tag: CofSchdInd is 'Unscheduled', and CIT/MIT Framework Indicator is 'M101'".	15.04.5	February 25, 2026
2	Added the "Payment Method Type" field. Added the value 'Comdata' in the Card Type field. Changed the rule in the Account Number field from "This field is limited to 19 digits unless the Card Type is Sunoco or Valero." to "This field is limited to 19 digits unless the Card Type is Sunoco or ValeroUCC." Added the following rule to the Card Type field: "When the Card Type is 'Comdata', the following transaction types are only permitted: Authorization, Completion, Sale, Verification and FileDownload."	15.04.5	February 25, 2026

3	Removed the following rule from the Additional Amount Type field: “For Partial Reversal and Completion transactions, the TotalAuthAmt must contain the total transaction amount that was authorized (which includes the initial transaction amount, preceding incremental transaction amount(s), preceding partial reversal amount(s) and preceding Completion amount(s) adjustments).”. Added the following rule to the Additional Amount Type field: “For Partial Reversal, Void/Full Reversal and Completion transactions, the TotalAuthAmt must contain the total transaction amount that was authorized in case prior Incremental Authorization(s) are present (which includes the initial transaction amount, preceding incremental transaction amount(s), preceding partial reversal amount(s) and preceding Completion amount(s) adjustments). If no prior Incremental Authorization(s) are present, then TotalAuthAmt must contain the Initial Authorization Amount.” Added the following rule to the Additional Amount Type field: “When the Payment Type is Fleet, the value of ‘Cashback’ is only applicable when the Card Type is ‘NGFC’, ‘WexOTR’ or ‘Comdata’.”	15.04.5	February 25, 2026

Mexican Card Group

Revision History

Section	Change Log	Version	Date
1	Changed the description of value ‘PIN’ in the Cardholder Identification Method field from “Offline PIN Verified by Chip” to “Online PIN or Offline PIN Verified by Chip”.	15.04.5	February 25, 2026

Terminal Environment Group

Revision History

Section	Change Log	Version	Date
	New asset added.	15.04.5	February 25, 2026

Fleet Group

Revision History

Section	Change Log	Version	Date
1	Added the Fleet Card Type 'Comdata' to the Fleet Transaction Support table in the Fleet Group.	15.04.5	February 25, 2026

Section	Change Log	Version	Date
1	Added the following response code: “125 – Card being used in off hours”.	15.04.5	February 25, 2026
5	Added the following code: “33 – Comdata”.	15.04.5	February 25, 2026

Rapid Connect® Overview

Revision History

Section	Change Log	Version	Date
10	Added the ‘TERMINAL ENVIRONMENT GROUP’, ‘Enhanced Fleet Group’ and ‘Enhanced Fleet Product Limit Group’.	15.04.5	February 25, 2026

File Download Group

Revision History

Section	Change Log	Version	Date
1	Added the following File Type value: “FUELPRICE – Fuel Price”. Changed the description of value ‘F’ in the Function Code field from “Final Block in a SITECFG, TERMAIL and FUELRPT Load” to “Final Block in a SITECFG, TERMAIL, FUELRPT and FUELPRICE Load”. Added the following rule to the Function Code field: “When the File Type value is FUELPRICE and the request value is F, the corresponding response value can be L or E.” Changed the rule in the Function Code field from “The value of F is only supported for the File Type SITECFG, TERMAIL and FUELRPT.” to “The value of F is only supported for the File Type SITECFG, TERMAIL, FUELRPT and FUELPRICE.” Added the following rule to the File Block Data field: “This field must be present in the File Download request message	15.04.5	February 25, 2026

	when the File Type is FUELPRICE and Function Code is F." Changed the rule in the File Block Data field from "This field is not returned in FileDownload response messages when the File Type is RECTXT, HOSTDISC or TABLE." to "This field is not returned in FileDownload response messages when the File Type is RECTXT, HOSTDISC, TABLE or FUELPRICE."		
2	Added the following values to the Table Load Card Type field: 094, 095 and 096.	15.04.5	February 25, 2026

Check Group

Revision History

Section	Change Log	Version	Date
1	Added the following values to the Check Service Provider field: "ExpressCode – Express Code", and "ComCheck – Comdata Check". Added the following rules to the Check Service Provider field: "The only valid Transaction Type for ComCheck is Authorization.", and "The only valid Transaction Type for ExpressCode is Sale."	15.04.5	February 25, 2026

Product Code

Revision History

Section	Change Log	Version	Date
1	Added the “Adjusted Product Amount” field. Changed the Note in the description of the Product Code Detail Group from “For each set of Product Code Detail that needs to be passed, a group of NACS Product Code, Unit of Measure, Quantity, Unit Price, and Product Amount must be present.” to “For each set of Product Code Detail that needs to be passed, a group of NACS Product Code, Unit of Measure, Quantity, Unit Price, and Product Amount / Adjusted Product Amount must be present.” Added the following rule to the NACS Product Code field: “When Card Type is ‘Comdata’ and the NACS Product Code value is above 899 and not 955 (Cash Back), the product entry should not be included.” Changed the rule in the Product Amount field from “This field is mandatory for Completion, Sale and Refund Transactions when Payment Type is Fleet.” to “This field is mandatory for Completion, Sale and Refund Transactions when Payment Type is Fleet, except when the Card Type is ‘Comdata’.” Changed the rule in the Product Amount field from “This field is mandatory for transactions where fuel is purchased, except when the Terminal Category Code is 05 and the Transaction Type is Authorization.” to “This field is mandatory for transactions where fuel is purchased, except when the Terminal Category Code is 05 and the Transaction Type is Authorization or when the Card Type is ‘Comdata’.”	15.04.5	February 25, 2026

Appendix D

Revision History

Section	Change Log	Version	Date
1	Changed the rule from "Merchants must submit all Voids (except for Credit Authorization) within 25 minutes of the original transaction for the Payment Types Credit, Debit, PINLess POS Debit, EBT and PLDebit except when the PLDebit transaction includes the Settlement Indicator value of 3. Note: Merchants can submit a Void/ Full Reversal for a Credit Authorization any time before they settle it (i.e. before sending a Completion / BatchSettleDetail, or sending a batch settlement file), except when the Credit Authorization is routed to a Debit network in which case merchants must submit a Void/ Full Reversal within 25 minutes of the original transaction." to "Merchants must submit all Voids (except for Credit Authorization and Credit Completion) within 25 minutes of the original transaction for the Payment Types Credit, Debit, PINLess POS Debit, EBT and PLDebit except when the PLDebit transaction includes the Settlement Indicator value of 3. Note: Merchants can submit a Void/ Full Reversal for a Credit Authorization any time before they settle it (i.e. before sending a Completion / BatchSettleDetail, or sending a batch settlement file), except when the Credit Authorization is routed to a Debit network in which case merchants must submit a Void/ Full Reversal within 25 minutes of the original transaction. Note: Merchants can submit a Void/ Full Reversal of a Credit Completion before the merchant cut-off for the day. This has limited platform availability. For more information, please contact your Account Representative."	15.04.5	February 25, 2026
3	Update verbiages and tables for the various scenarios in the Appendix D – Partial Reversal Processing Section.	15.04.5	February 25, 2026

AMEX Group

Revision History

Section	Change Log	Version	Date
1	Changed the rule in the Am Ex Tran ID field from “The same Am Ex Tran ID that was received in the original response message must be submitted in subsequent transactions (e.g. Voids/Full Reversals, Completions, etc.) except when the Private Label Group is present.” to “The same Am Ex Tran ID that was received in the original response message must be submitted in subsequent transactions (e.g. Voids/Full Reversals, Completions, etc.) except for Timeout Reversals or when the Private Label Group is present.”	15.04.5	February 25, 2026

Discover Group

Revision History

Section	Change Log	Version	Date
1	Changed the rule in the Discover NRID field from “This field must be submitted in subsequent transactions (e.g. Voids/Full Reversals, Completions, etc.) if it was returned in the authorization response message except when the Private Label Group is present.” to “This field must be submitted in subsequent transactions (e.g. Voids/Full Reversals, Completions, etc.) if it was returned in the authorization response message except for Timeout Reversals or when the Private Label Group is present.”	15.04.5	February 25, 2026

VISA Group

Revision History

Section	Change Log	Version	Date
1	Changed the rule in the Transaction Identifier field from "This field must be submitted on subsequent transactions (e.g. Voids/Full Reversals, Completion Messages, etc) just as it was returned in the authorization response message, if available except when the Private Label Group is present." to "This field must be submitted on subsequent transactions (e.g. Voids/Full Reversals, Completion Messages, etc) just as it was returned in the authorization response message, if available, except for Timeout Reversals or when the Private Label Group is present."	15.04.5	February 25, 2026

Original Authorization Group

Revision History

Section	Change Log	Version	Date
1	Changed the rule in the Original Local Date and Time field from "If the Reversal Reason Code is TORVoid, this field must have the Original Local Date and Time of the Void message and not the original transaction." to "If the Reversal Reason Code is TORVoid, this field must contain the 'Original Local Date and Time' value from the Void message being reversed and not the original transaction."	15.04.5	February 25, 2026

Ecommerce

Revision History

Section	Change Log	Version	Date
1	Changed the rule in the Ecomm Transaction Indicator field from “This field must be supplied on all E-commerce transactions, except on the following scenario: • When the transaction is Canadian Debit In-App / In-Browser for which this field is not permitted.” to “This field must be supplied on all E-commerce transactions, except on the following scenarios: • When the transaction is Canadian Debit In-App / In-Browser for which this field is not permitted. • When the transaction contains the Bill Payment Indicator field with value of ‘Recurring’ or ‘Installment’, the Card Type is ‘Visa’, and the Merchant Choice Routing Indicator field is not present with value 'M', 'F' or 'Y' for which this field is not permitted.” Changed the rule in the Multiple Clearing Sequence Number and Multiple Clearing Sequence Count fields from “This field can only be sent in a Visa, MasterCard, Discover (JCB - US Domestic and Diners) or AMEX Completion or BatchSettleDetail, or a Debit Completion transaction where POS Condition Code = 04, 08 or 59.” to “This field can only be sent if one of the following conditions is met: • Transaction is a Visa, MasterCard, Discover (JCB - US Domestic and Diners) or AMEX Completion or BatchSettleDetail where POS Condition Code = 04, 08 or 59, • Transaction is a Debit Completion where POS Condition Code = 04, 08 or 59. • Transaction is a Private Label Completion where Card Type = GenProp and POS Condition Code = 59.”	15.04.5	February 25, 2026

2	Changed the rule in the Visa Secure Transaction Authentication Data field from “This field must be sent in a Visa transaction if ECOMM Group.Ecomm Transaction Indicator field contains the value of ‘01’ or ‘03’, Digital Wallet Program Type field is present, and Bill Payment Transaction Indicator field is not present.” to “This field must be sent in a Visa transaction if ECOMM Group.Ecomm Transaction Indicator field contains the value of ‘01’ or ‘03’, Digital Wallet Program Type field is present, and Bill Payment Transaction Indicator field is not present, except when the transaction includes the Merchant Choice Routing Indicator field with the value of ‘F’ or ‘Y’, then the cryptogram should be sent in SecrTxnAD.” Changed the description of the Token Authentication Verification Data field from “This is a cryptographic value that is generated during the VISA or MasterCard transaction authentication process i.e. an In-App token transaction.” to “ This is a cryptographic value that is generated during the VISA, MasterCard, Discover or EFTPOS transaction authentication process i.e. an In-App token transaction.” Changed the rule in the Token Authentication Verification Data field from “If this field is present in an In-App token transaction for VISA or Discover, then the ECOMM Group.Ecomm Transaction Indicator must be either 01, 02 or 03.” to “If this field is present in an In-App token transaction for VISA, Discover or EFTPOS, then the ECOMM Group.Ecomm Transaction Indicator must be either 01, 02 or 03.”	15.04.5	February 25, 2026

Appendix J

Revision History

Section	Change Log	Version	Date
1	Added “FUELPRICE – Fuel Price” to File Download Types. Added “FUELPRICE” column in Download Process table.	15.04.5	February 25, 2026

Appendix P

Revision History

Section	Change Log	Version	Date
1	Added the below records – New Record types added – XE16 Record types updated – XG16, XE09, XE04, XG05, XE12, XD05, E	15.04.5	February 25, 2026

Appendix V

Revision History

Section	Change Log	Version	Date
1	Added Record - PAD001, PAD002, PAD003, IVG001 Updated Record - PMR001, IMG001, EDI002, ION001, EDI004, EVI004, PAF001	15.04.5	February 25, 2025

Credit Card Transactions
